

## CE26 JUICE EXTRACTOR

### DESCRIPTION

The juice extractor CE26 is equipped with a powerful dual speed 400-watt motor: at the maximum speed you can easily extract the juice from hard fruits and vegetables such as apples and beets, while at low-speed you can use it for softer fruits or green leafy vegetables such as cantaloupe and spinach. Equipped with an extra-large 6 cm diameter feeding tube, this unit will make you save your time in the kitchen as it is able to comfortably accommodate large pieces of fruits and vegetables, eliminating the need to cut them. Completely removable for easy cleaning, this product has a stainless steel double level micro-frame filter to obtain 20% more juice than traditional extractor. A safety device inhibits each operation if the lid is not correctly locked in position, while the motor protection device prevents from overheating, automatically shutting it down in case of excessive stress.

### TECHNICAL FEATURES
